

RICHARD
WOLF

spirit of excellence

Since 1906, we have been guided by a focused mission: improve patient outcomes through innovations in endoscopy. As a global leader in minimally invasive surgery, we deliver solutions that enhance surgical results, reduce trauma, and pave the way for groundbreaking procedures. From the earliest stages of R&D to the moment one of our instruments is shipped to a facility, we are driven by the ***spirit of excellence.***

We are pioneers in endoscopy.

We are engineers, craftsmen, clinical experts, and innovators.

We are outcome-driven and patient-focused.

We are Richard Wolf.

A Message From Our Leadership

Stefan Heffner, Executive Vice President

Spirit of excellence. At RichardWolf, this is the phrase we live by. Each day, it drives us in our mission to shape the future of minimally invasive surgery. From product development and manufacturing to sales and customer service, every facet of our business is an embodiment of this spirit.

To ensure this dedication to excellence is reflected across our entire product line, we collaborate with leading surgeons around the world to gather vital clinical insights and learn how existing technologies can be made better. The spirit of excellence extends beyond just our portfolio. ***It is equally evident in our commitment to customers—strong partnerships rooted in a shared dedication to truly life-changing work.***

Our Heritage

RIGHT, ORIGINAL COMPANY BRAND MARK.

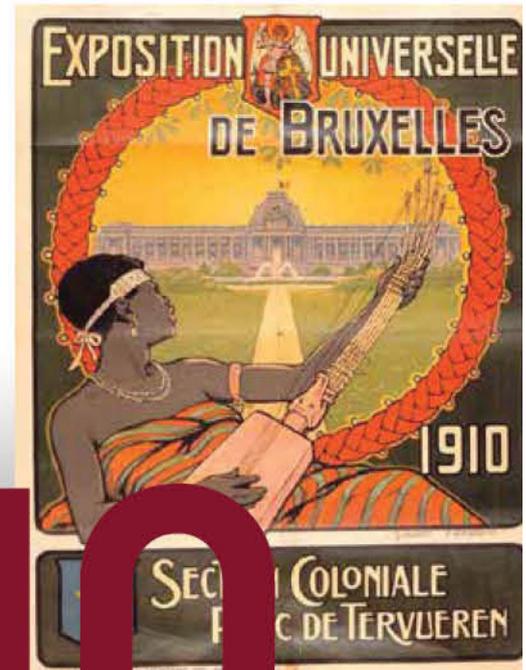

1906

Georg Wolf Fabrik elektromechanischer Apparate und Instrumente is founded by Berlin instrument maker Georg Wolf. He and his small team of craftsmen begin manufacturing endoscopic instrumentation, which Wolf believes to be the future of medicine. From the start, they enlist the help of respected doctors in their design process.

1910

Georg Wolf, Fabrik elektromechanischer Apparate und Instrumente is awarded a Gold Medal at the World Fair in Brussels.

1910

1937

The company receives First Prize at the World Fair in Paris. By this time, *Georg Wolf* has cemented itself as the world's foremost manufacturer of endoscopes.

1938

Georg Wolf passes away and his son, Richard, is named partner and managing director.

1931

CELEBRATING 25 YEARS OF BUSINESS, JANUARY 15, 1931.

1968

Richard Wolf passes and his wife, Annemarie, assumes leadership of the company.

ABOVE, *Richard and Annemarie Wolf at the Congress of Surgeons in Munich, 1955.*

ABOVE RIGHT, *Herbert Schubert looks on as a doctor examines a filmtype cystoscope and television device at a congress in Munich, 1958.*

1969

Herbert Schubert, who joined the company in 1934 as an apprentice, is named managing director. Schubert is driven by two fundamental goals: broaden Richard Wolf's portfolio and expand into international markets.

19

Richard Wolf Medical Corporation (the subsidiaries) is founded to meet the growth of Richard Wolf instrumentation in the US.

1991

Richard Wolf Medical Corporation moves its headquarters to Vernon Hills, IL.

1968

The Richard and Annemarie Wolf Foundation is established. The company is bequeathed to the foundation, whose mission is to promote medical science, particularly in those fields where endoscopic instrumentation is used.

1972

1972

Richard Wolf Medical Instruments Corporation (the first of the global subsidiaries) is founded in Rosemont, Illinois to meet the growing demand for Richard Wolf instrumentation among surgeons in the US.

1991

Richard Wolf Medical Instruments Corporation moves to a larger facility in Vernon Hills, Illinois.

2010

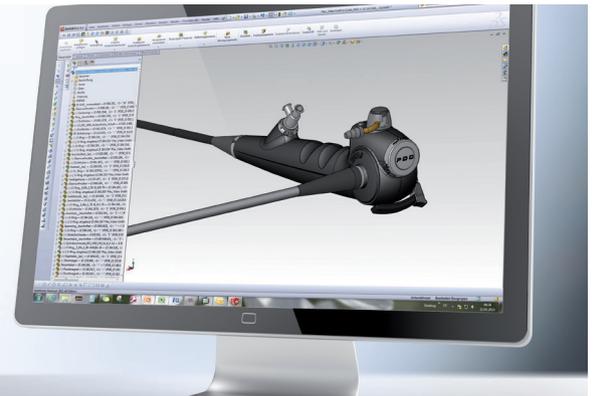

Richard Wolf Academy Prima Vista opens its doors—a state-of-the-art biolab and lecture hall at US headquarters for visiting surgeons, sales representatives, and clinical specialists to explore new technologies and instrumentation.

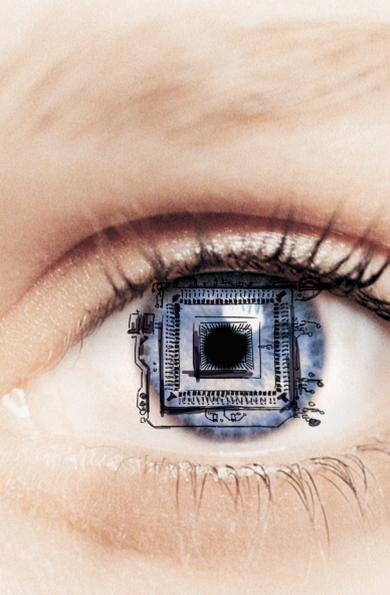

Crafted in Germany. Trusted around the world.

Our Endoscopes & Instrumentation

Precision. Versatility. Longevity. Superior optics and ergonomics. These are the characteristics that define Richard Wolf instrumentation. Through careful collaboration with respected physicians, we have built a portfolio that is as innovative as it is extensive. Our endoscopes, hand instruments, and working elements are used for a wide range of procedures and, above all, are designed to meet the needs of the surgeon and ensure the health of the patient.

Visionary solutions.

Our Imaging and Integration Technologies

When it comes to medical imaging, beauty is in the details—both the brilliant detail of the picture on display and the advanced technologies that bring that picture to life. Richard Wolf camera systems pair stunning optics and user-friendly interfaces to meet the visualization needs of virtually all surgical specialties.

From ultra high-definition camera heads to a complete OR integration system, we offer an entire chain of intelligent imaging and data management solutions. Richard Wolf is transforming the digital imaging landscape through intuitive, software-based platforms, engineered with future innovation in mind.

ULTRA

ERAGON modular

Richard Wolf is proud to offer cutting-edge solutions for laparoscopy and minimally invasive colorectal surgery. We have always placed the highest premium on durability and versatility, and nowhere is this more evident than in our laparoscopic instrumentation. We offer a comprehensive portfolio of jaw patterns for standard and bariatric laparoscopy as well as a full set of 3.5 mm instruments for mini-laparoscopy. When it comes to visualization, our ultra high-definition telescopes are second to none.

ERAGON modular
mini

From the office to the OR, our robust, high-precision technologies are helping gynecologists achieve better patient outcomes. With a cutting-edge fluid management system, the market's thinnest bipolar resectoscope, and a full line of instrumentation for standard and mini-laparoscopy, Richard Wolf has established itself as a key player in gynecologic surgery. With more physicians shifting toward office-based procedures, we are also equipped to meet their needs with our 3.8 mm Compact Hysteroscope and ENDOCAM® Flex HD imaging system.

Bronchoscopy and Thoracic Surgery

Richard Wolf products have helped give rise to innovative therapies in upper respiratory endoscopy and thoracic surgery. We offer trusted solutions for operational laryngoscopy, central airway visualization, and the diagnosis of malignancies in the upper area of the mediastinum. Richard Wolf introduced the first optically-integrated rigid bronchoscope and continues to offer a complete mini-thoracoscopy set.

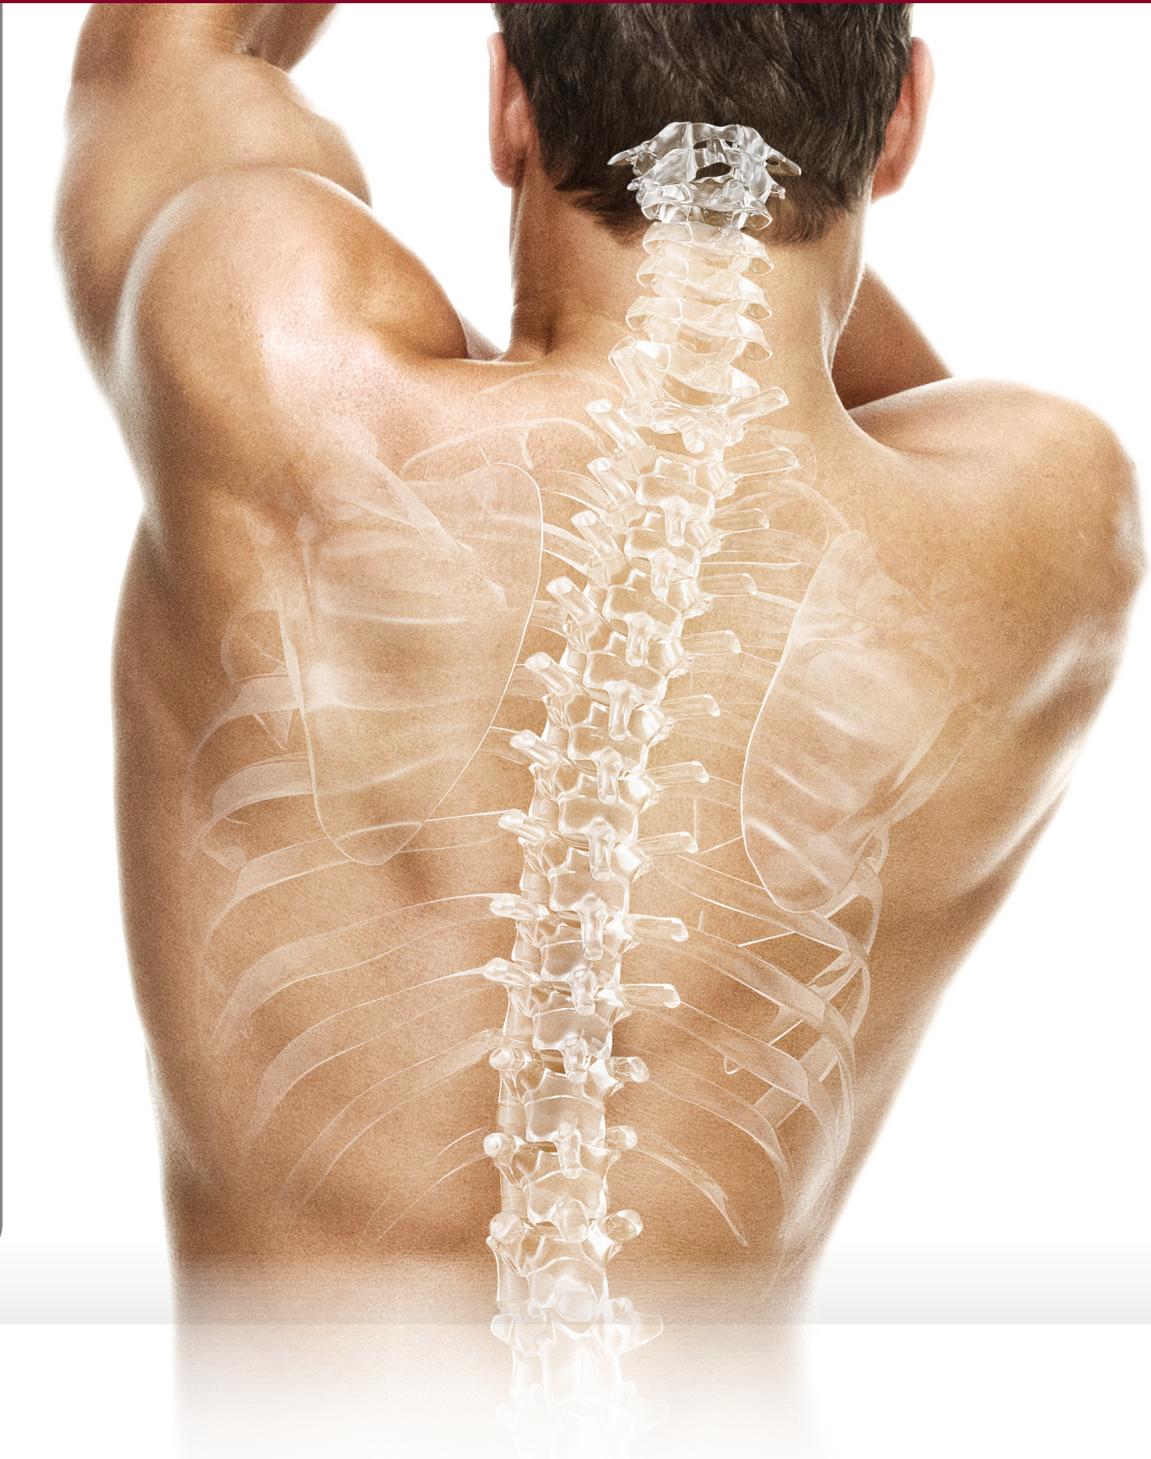

Rigid Integrated Bronchoscope

RIWOSPINE

A Richard Wolf Company

Spine Surgery

Richard Wolf has been a pioneer in spine endoscopy since the mid 1990s when we unveiled the groundbreaking YESS spine endoscopy system. In the years after, we developed the first formal techniques and complete instrument sets for central stenosis, dorsal ramus rhizotomy, anterior and posterior cervical decompression, and interlaminar lumbar decompression. We have helped establish these surgical methods through research and clinical studies, and have trained thousands of doctors through society partnerships and training programs at Richard Wolf Academy Prima Vista.

We are known in the field of spine endoscopy for the technical innovations we have brought to spine instrumentation, such as the advent of articulating instruments that increase working range. All Richard Wolf endoscopes feature brilliant optics and are fully compatible with our HD camera systems.

In 2016, RIWOspine—a division of Richard Wolf—was created to address the unique needs of endoscopic spine surgeons worldwide.

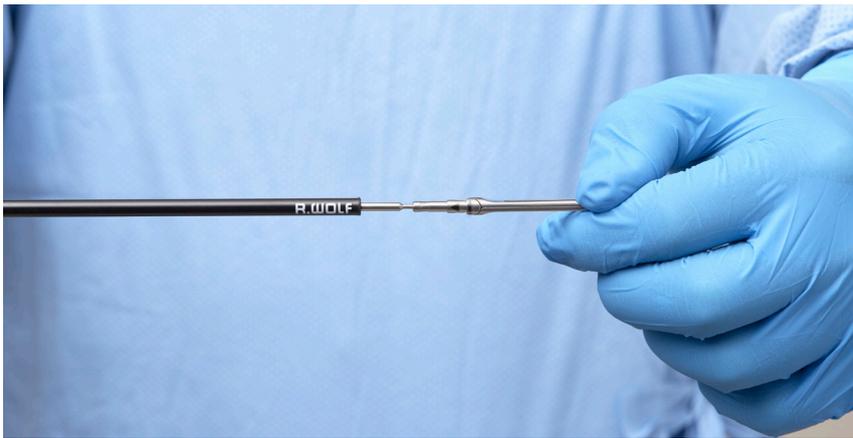

Setting the standard in safety and sustainability.

Our Reprocessing Solutions

The ability to effectively clean and sterilize a reusable medical instrument is critical to its functionality and longevity, and more importantly, to ensuring patient safety.

All reusable Richard Wolf products are designed to stand the test of time. They are manufactured with materials that can handle repeated exposure to cleaning chemicals and sterilization processes, and are made with components that can be easily disassembled for streamlined reprocessing.

We also offer a full line of sterilization and reprocessing solutions: scope protectors, cleaning brushes, and custom reprocessing trays designed specifically for Richard Wolf instrumentation, to name just a few.

Our commitment to reprocessing excellence goes beyond our products themselves. Throughout the year, our clinical specialists travel the country training central service professionals—those who are entrusted with the vital processes that take place before a surgeon ever steps into the operating room.

We are Richard Wolf.

Richard Wolf Medical Instruments Corporation

Richard Wolf Medical Instruments Corporation, the first and largest of Richard Wolf's global subsidiaries, has been serving the US market since 1972. Geographically, we are right where we need to be—in the heart of the Midwest, just north of downtown Chicago. Our centralized location allows us to quickly ship new and repaired instruments all around the country.

Richard Wolf's US headquarters is home to production, sales and marketing, repair, customer service, and administrative teams, as well as a state-of-the-art biolab and training facility. Out in the field, our clinical experts and sales representatives are servicing accounts all across the country.

200+ employees from
18 countries

At first sight.

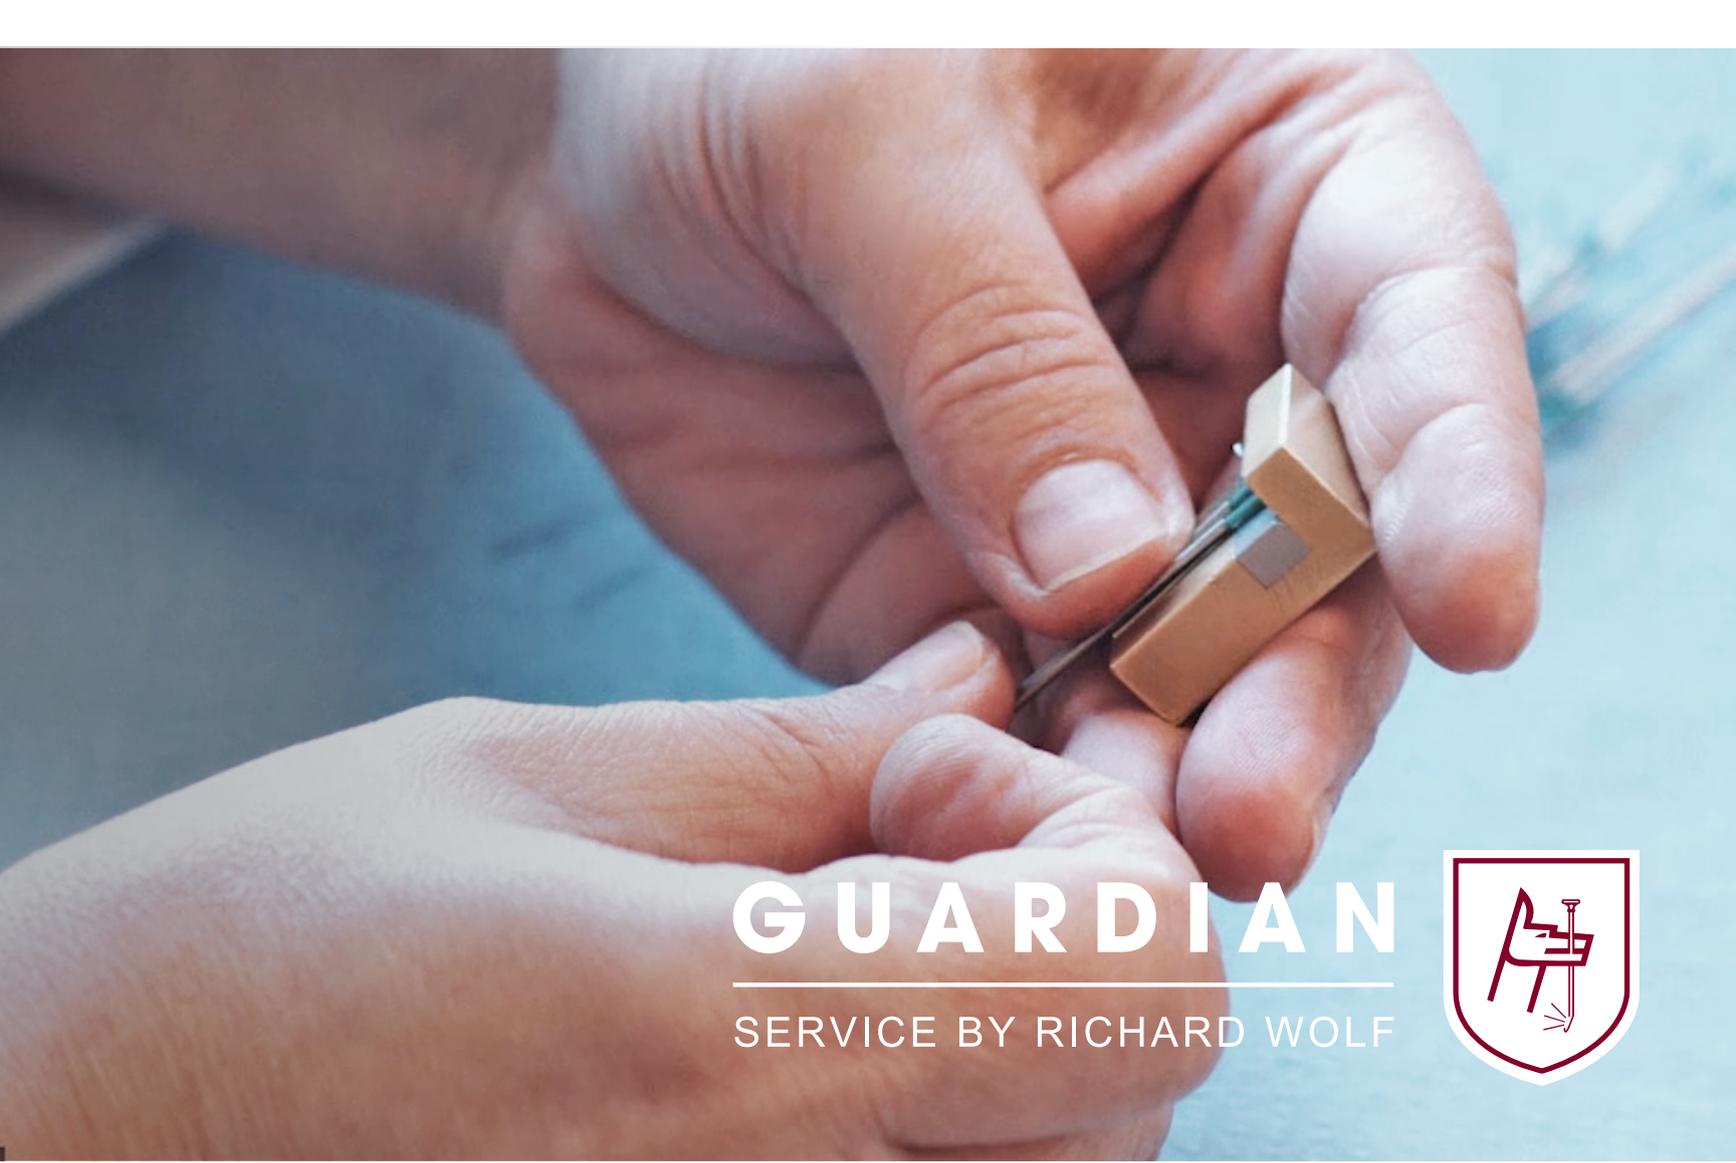

Richard Wolf Academy Prima Vista

Endoscopy is evolving rapidly and Richard Wolf is doing our part to help surgeons keep pace with clinical advances and groundbreaking technologies. Since 2010, Richard Wolf Academy Prima Vista has led the way in surgical education, exemplifying peer-to-peer learning at its best. Through a combination of didactic and hands-on instruction, our training programs give physicians an opportunity to learn from thought leaders in their field, gaining exposure to new techniques and the impact they have on patient outcomes.

We also provide ongoing training to members of our sales force so they can expand their clinical knowledge and gain a deeper understanding of Richard Wolf's innovative technologies. In accelerated workshops, online seminars, and our weeklong basic training program, visitors are able to learn from leading surgeons and our full team of clinical experts.

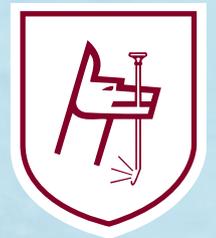

Located at Richard Wolf Medical Instruments, our state-of-the-art biolab and 60-seat lecture hall is part of the Prima Vista worldwide network.

GUARDIAN

SERVICE BY RICHARD WOLF

Protecting performance.

Our Repair & Service Program

We take great pride in the quality and dependability of our products, but damage over the life of an instrument can never be entirely eliminated. For that reason, we have created a comprehensive service framework, designed to save our customers time and money. With any repair, we aim for the fastest possible turnaround, but never make sacrifices when it comes to the quality and thoroughness of our work. A device is shipped to a customer only after testing has shown it is ready to perform like new.

Our team is here to help you identify transparent, tailored service solutions that best fit your clinical and financial needs. Our commitment to you—lower ownership costs, faster repairs, and exceptional customer service.

Customers come first.

Richard Wolf Customer Service

Customers are making a major investment when they choose to partner with Richard Wolf. We recognize the weight of this decision and do everything we can to ensure they have the support they need to deliver their best care. Richard Wolf products speak for themselves but it is our commitment to customers that sets us apart.

It takes a team to deliver timely, reliable customer service. From sales representatives and clinical experts out in the field to product managers and customer service specialists in the home office, all of us at Richard Wolf put customers and patients first.
