

A Petite Solution for Bipolar Resection

PRINCESS
Slender 7 mm resectoscope

PRINCESS

Slender 7 mm resectoscope

The Princess is a uniquely petite resectoscope with an outer diameter of only 7 mm. Its small dimensions allow for significantly reduced dilatation, low resistance upon insertion, and precise dissection — making it ideal for use in patients with cervical stenosis or fertility issues.

Versatile Design for Expanded Treatment Options

- Hybrid technology for use with bipolar or monopolar energy
- Fixed and rotatable sheath options
- Working bridge for use with instruments up to 7 Fr.
- 8 mm outer diameter available for use with a larger loop
- Compatible with the 2.7 mm, 12° or 30° PANOVIEW PLUS telescopes

Double sheath system

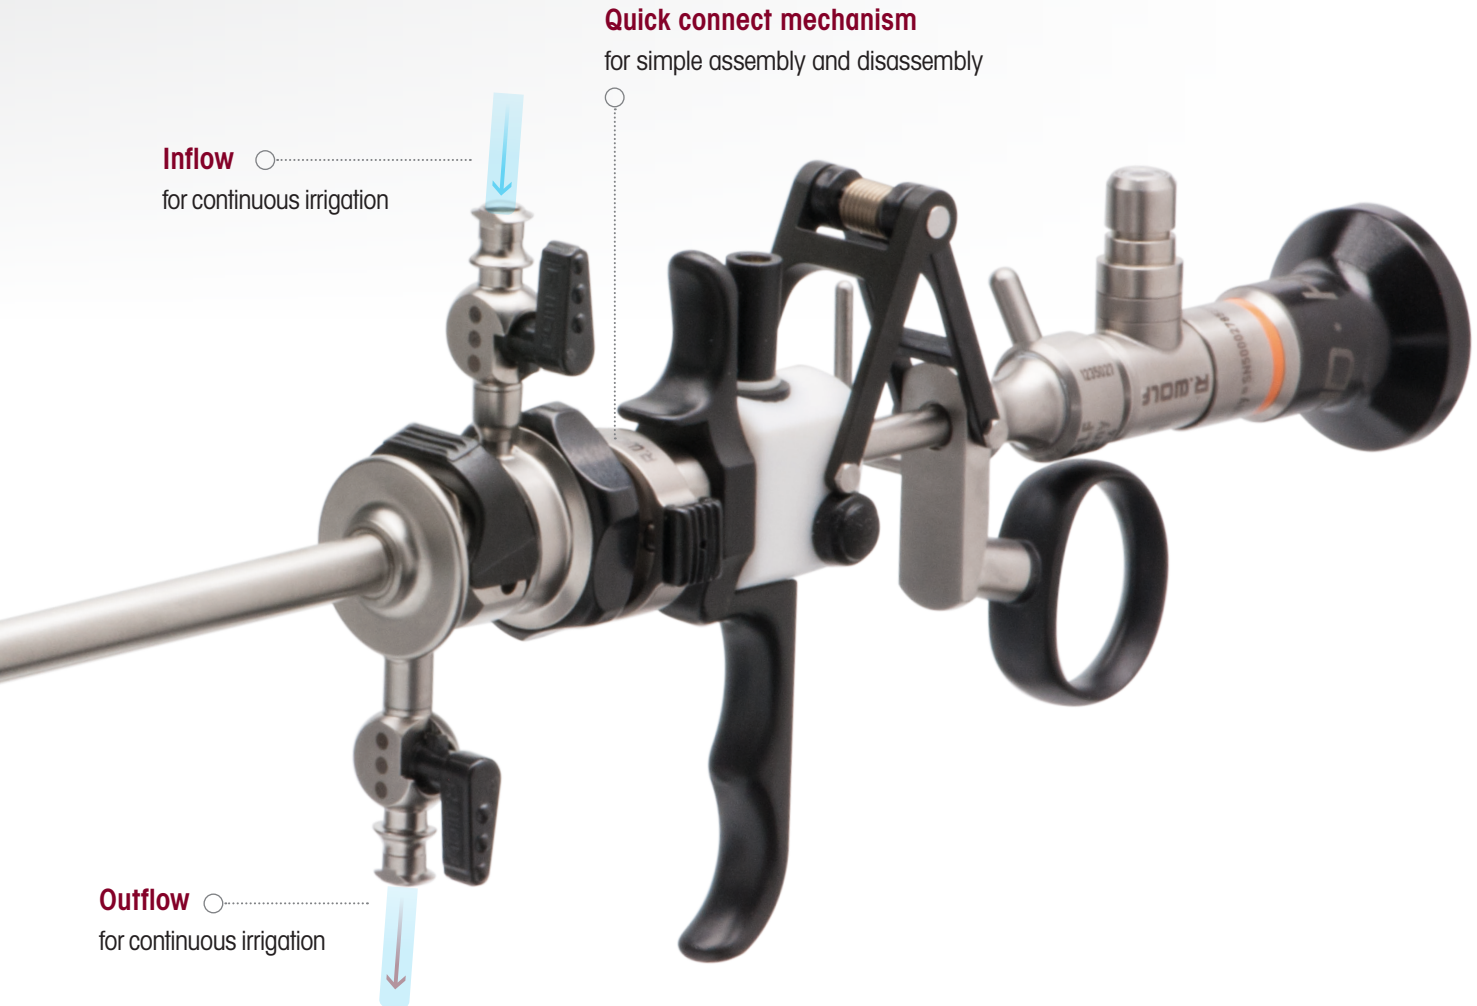

permits 360° rotation of the inner sheath while the outer sheath remains in place*

Wide range of single use electrodes for various applications like:

- Myomectomy
- Polypectomy
- Endometrial Ablation
- May be used with both monopolar and bipolar energy**

*Available with rotatable model.

**BIVAP electrode can only be used with bipolar energy.

Classic resectoscope

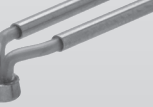

7 mm Princess Resectoscope

Slender 7 mm diameter for

- Reduced dilatation
- Less insertion resistance
- Decreased trauma to the cervical canal

Diameter	Model	Outer Sheath	Inner Sheath	Rotatable Inner Sheath Consisting of:		Working Element with Open Handle	Ø 2.7 mm, 12° Telescope
7 mm	Rigid	8653.021	8653.018	-----		8653.224	8974.412
	Rotatable	8653022	8653019	Inner sheath	86530191		
				Rotatable connector	86533643		
8 mm	Rotatable	8655.334	8655.344	Inner sheath	8655.3441		
				Rotatable connector	8654.3642		

Electrodes	Description	Size		Product Number
		7 mm	8 mm	
 Cutting electrode	Bipolar/Monopolar, 3/box, packed individually, sterile	•		4653.1313
 Cutting electrode	Bipolar/Monopolar, 3/box, packed individually, sterile		•	4653.1323
 Roller electrode	Bipolar/Monopolar, 3/box, packed individually, sterile	•	•	4653.023
 Hook electrode	Bipolar/Monopolar, 3/box, packed individually, sterile	•	•	4653033
 BIVAP electrode	Bipolar, 3/box, packed individually, sterile	•		46530213
			•	46530243

Accessories

- Working insert for auxiliary instruments up to 7 Fr.8653284
- 2.7 mm, 30° Telescope8974.402
- Viewing obturator for 21 Fr.865319
- Obturator for 21 Fr.8653.18
- Obturator for 24 Fr.8654.16
- HF bipolar connection cable for Erbe VIO® 3, 3 m21196-119
- HF monopolar connection cable for Valley lab, Bovie, Conmed, 3 m815.033
- Fiber light cable set Ø 2.5 mm (green color/markings green), 3 m806625301
- Scope Protector 5/pkg8570.9325
- Universal Reprocessing Tray 22.8" L x 11.1" W x 3.8" H8585.023
