

Protect your investment. Clean with confidence.

**Disposable  
cleaning brushes**

# Distinctive backloading method

Protect your investment with Richard Wolf Disposable Cleaning Brushes. Whether you have a flexible, rigid, or semi-rigid device, our brushes are designed to be inserted brushless end first. This allows the brush head to pull debris out of the channel, helping to produce an effective clean.

- Various brush sizes, all validated for use by channel diameter
- Non-abrasive brush heads, to protect the internal channel surfaces
- Disposable, to reduce risk of cross-contamination

Ask about our Double Conical Straight Cleaning Brushes for small, hard to reach areas.

Contact your Richard Wolf Representative or call (800) 323-WOLF (9653) for ordering information.
