# Masterclass Workshop

## Minimally-Invasive Upper GI Surgery

University Medical Center Mainz, Germany  
December 15 to 16, 2022

## Dear colleagues and surgeons,

Over the past years advanced surgical techniques for minimally-invasive gastric and esophageal surgery were developed. New surgical strategies and technological innovations brought the upper-GI cancer surgery to the highest level. In Mainz the fully minimally-invasive esophageal surgery is the standard procedure beside robotic procedures as well as minimally invasive gastric cancer surgery.

In this masterclass workshop we would like to show essential technical steps in minimally-invasive upper GI surgery. We hope to welcome you soon.

Kind regards,

Peter Grimminger and Hauke Lang
