

Perfection fits  
everywhere

## **Sterile Universal Sealing Valve**

Self-closing seal system for  
universal application

# Sterile Universal Sealing Valve

The new sterile universal sealing valve from Richard Wolf is a small masterpiece of engineering. It features a high level of adaptability with simple, comfortable handling. Absolute dependability and a broad range of applications make the self-closing seal system a valuable tool for streamlined and precise working.

## Perfection fits everywhere

- **Versatile:** Ideal for diagnostics and therapy with rigid and flexible ureterorenoscopes, nephroscopes, flexible cystoscopes, etc.
- **Universal:** Suitable for all 3 mm luer connectors and mounting threads on ureterorenoscopes and nephroscopes. An internal and external thread on the valve makes this possible.
- **Flexible:** Automatically fits endoscopic auxiliary instruments up to 6 Fr.
- **Comfortable:** Smooth-running, self-centering applicator. Easy threading from distal and proximal end possible, without egress of irrigation fluid.
- **Unique:** Packed singly, sterile and useable immediately.
- **Safe:** Sure-grip profile for good hold even under wet and slippery conditions.

### Sterile Universal Sealing Valve

For inserting auxiliary instruments of 1 – 6 Fr., e.g. laser fibers, LithoClast probes, tipless baskets, guide wires, forceps, etc.,  
Single-use, sterile (pack of 5) ..... 4712348
